

Bacterial and viral diseases in humans: Salmonella and influenza

1 Match the type of disease to its description. Write the correct letter in each box

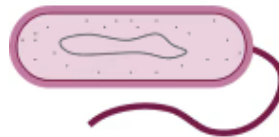

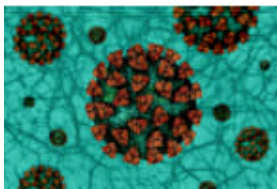

a	communicable
b	non-communicable

	can be passed from person to person
	cannot be spread from person to person

2 Which diseases are non-communicable? Tick 2 correct answers

- ☐ cancer
☐ measles
☐ COVID-19
☐ heart disease
☐ flu

3 Which picture shows a bacterium? Tick 1 correct answer

A

B

C

4 Match the word to its definition. Write the correct letter in each box

a	pathogen
b	virus
c	bacteria

	An infectious agent.
	A micro-organism that causes disease.
	A single celled prokaryote.

5 Which of the following can be pathogens? Tick **4** correct answers

- ☐ plants
- ☐ viruses
- ☐ protists
- ☐ fungi
- ☐ bacteria

6 What is a vaccination? Tick **1** correct answer

- ☐ An injection.
- ☐ A substance; used to stimulate the body's immune response against disease.
- ☐ A substance you take when you are ill.

Name: _____

Bacterial and viral diseases in humans: *Salmonella* and influenza

Task A: Pathogens

1. What is a pathogen?
2. Name two types of pathogen.
3. Describe how some microorganisms can be useful.

Task B: Pathogenic bacteria

1. Describe some of the symptoms of *Salmonella*.
2. Explain why you cannot catch *Salmonella* by standing close to someone with the infection.

raw chicken

Task C: Pathogenic viruses

1. Explain why influenza is a communicable disease.

3. Describe how we can prevent the spread of influenza.

Bacterial and viral diseases in humans: Salmonella and influenza

1 True or false? Pathogens are microorganisms that cause disease. Tick **1** correct answer

☐

true

☐

false

2 Pathogenic bacteria can produce _____ that damage living tissue and cause disease. Fill in the blank

3 Match the disease to how it is spread. Write the correct letter in each box

a	Salmonella
b	flu

	Spread by consuming contaminated food and water.
	Spread through mucus droplets when coughing and sneezing.

4 What are the symptoms of salmonella? Tick **4** correct answers

☐

high temperature

☐

diarrhea

☐

shortness of breath

☐

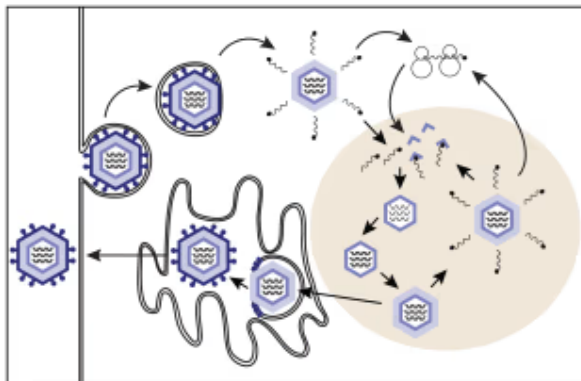

vomiting

☐

stomach cramps

- 5 Put the steps in order to show how a virus replicates using a host cell. Use numbers to show the correct order

	The cell replicates the virus.
	Virus enters the host cell.
	Virus bursts out of the cell causing damage to the host.

- 6 What is the best way to stop the spread of flu? Tick **1** correct answer

- ☐ hand washing
- ☐ vaccination
- ☐ staying indoors
- ☐ eating a healthy diet
